

[re]Generation UCB

The [re]Generation Universal Control Board (UCB) from Vendors Exchange provides one CPU board to fit multiple snack machines. Plug-and-play technology allows for quick installation of replacement boards and peripherals, including security devices, LCD touch-screens, remote communication devices, and more. Eliminate unnecessary trips and reduce training and inventory costs by using the same control board in each of your snack machines.

Features:

- Upgrades equipment to MDB Level 3/ DEX 6.0, allowing for remote audit
- Control board is universal to multiple machines, reducing inventory and training costs
- SD card slot provides means to update pricing, programming, and other data in seconds
- Plug-and-play features provide quick and easy replacement of control board and addition of features
- New power supply
- Tube-fill mode
- Compatible with foreign currency

Options:

- LCD Screen to display nutritional information, advertisements, etc.
- LED Lighting Kit and Motion Sensor
- Anti-Theft or Anti-Vandalism Camera
- Guaranteed Delivery Sensor
- Zigbee modem for remote communication

Available for:

- AP 110 Series, AP 6000/ 7000
