

## FOUR/FIVE WIDE BUCKET DEFLECTOR INSTALLATION

*For AP Series 4 Wide/5 Wide Vending Machines*

1

Remove the **Bucket Deflector (VE1020176)** from its container. Then, position with both hands to the center of the vend bucket near the flange as shown above.

2

Next, slide the Deflector into place until it rests on the edge of the flange on the vend bucket as shown in the **Resting Detail** view. If it is hard to slide manually, use a rubber mallet to slide it into place. Adjust it until it is snug in place, no fasteners are necessary.
